**“Sahara Solar Energy Research Centre, Project (SSERC)”**  
**The Fifth Joint Coordinating Committee (5<sup>th</sup> JCC)**

September, 29th ,2015

The Fifth Joint Coordinating Committee (JCC) is organised, at UDES, in the context of the Sahara Solar Breeder (SSB) project supported by JST/JICA and Algeria as international joint project to look forward to sustainable future energy from deserts. The 5<sup>th</sup> JCC is a big event of SSB Community of practice. This Joint Terminal Evaluation event on Japanese Technical Cooperation (SATREPS) for Sahara Solar Energy Research Centre Project in Algeria will provide a platform for attendees to finalise the on-going process of the SSB project evaluation and look for future planned projects to support networking, collaboration and knowledge exchange with Japanese community of practice.

The attendance and participation of each task manager, under the framework of the SSB project, are greatly appreciated and very important as we seek to strengthen our future cooperation with Japan on the followings:

- Concept, Objects;
- 6<sup>th</sup> AASEF: Asia-Africa Sustainable Energy Forum;
- Technology development;
- Conversion of desert sand and diatomite into solar grade Si;
- Superconducting DC transmission of solar electricity;
- Extension of SSB to neighbouring countries;
- Energy system, transmission, and international cooperation
