

Pr. Hacene MAHMOUDI

PhD, Mechanical engineering

Hacene Mahmoudi is a full Professor at Hassiba Benbouali University of Chlef, Algeria, where he was acting as Vice-Dean for external relations and cooperation and then, Vice-Rector for external relations and scientific events for more than five years. His doctoral degree is in mechanical engineering from the University of Sciences and Technology of Oran -USTO-Algeria (2008). It was a scientific collaboration and a co-supervising between USTO and SQU (Muscat, Sultanate of Oman).

Hacene served as guest editor of five special issues (ISI journals) and the editor of a CRC Press book. He is the author of over 50 publications and chapters in international journals and textbooks. Hacene is a member of the editorial board of scientific journals and books (Deswater, Water (MDPI), CRC Press...).

For some 20 years, he was involved in desalination, membrane science research, and in cooperations at European and international levels. His research expertise include desalination (renewable energy), sustainable development and membrane preparation and characterization and membrane contractors.

Pr. Mahmoudi organized more than five international conferences on water and energy, and one special event with International Desalination Association (IDA).
