

Pr. Frank RÖGENER

Frank Rögener studied chemical engineering at the TU Clausthal, Germany. In 2000, he received his doctorate from the University of Saarland on the application of membrane processes. Subsequently, he worked as a project leader in the Research and Development Department at Pall SeitzSchenk Filtersystems, Waldstetten, Germany. Afterwards, he worked in different positions and departments at Betriebsforschungsinstitut GmbH (BFI), Düsseldorf, Germany. In 2014, he became Professor of Fluid Process Technology at TH Köln / University of Applied Sciences, Cologne, Germany. Professor Frank Rögener is particularly interested in the development of membrane processes and resource/energy efficient technologies. He has been guest lecturer at different German and international Universities.
